## **DETAILED ACTION**

### **Restriction Requirement Applicable to All Groups Requiring a Combination:**

1. The claims are drawn to kits comprising a non-amplified detecting assay for detecting at least one CFTR alleles. While it is not completely clear what a kit comprising a detection assay is, it appears as though the claims encompass a kit comprising oligonucleotides for detection of various alleles of the CFTR gene. The restriction is to a kit comprising a particular combination of alleles. A kit comprising oligonucleotides for R560T is patentably distinct from a kit comprising I148T. The elected kit may comprise any one combination of alleles. The combination may be a combination of all alleles, or may be a single allele. Upon allowance of a kit comprising a particular allele, any kit including additional alleles would be subject to rejoinder.

As provided in MPEP 803.04, "Applicants will be required to select one combination for examination." The selected combination will be searched and examined. A combination may be as few as a single allele, as permitted by Claim 5 or as many alleles as the combination of all the recited genes. Applicant is required to specifically indicate the single combination desired.

A search of alleles A and B, for example is patentably distinct from a search for genes C and D.

All combinations containing the allowable sequences and any patentably indistinct sequences will be rejoined and allowed. Rejoinder will be permitted for claims

Art Unit: 1634

requiring any allowable sequence(s). Any claims which have been restricted and nonselected and which are limited to the allowable sequence(s) will be rejoined and examined.

Should applicant traverse on the ground that the different combinations of nucleic acids are not patentably distinct, applicant should submit evident or identify such evidence now of record showing the species to be obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other inventions.

2. A telephone call was made to Jason Bond on May 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant requested the restriction requirement in writing.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
